Airport Tower Simulator 'Tower! 3D' Challenges You To Guide Aircraft To And From The Active Runway On PC

San Francisco, CA, January 27th 2017: Games-simulation specialist FeelThere is proud to announce the launch of **Tower! 3D**, the official successor to the popular and best-selling Tower! 2011 airport tower simulator.

Watch the game trailer here.

Tower! 3D challenges you to guide aircraft of various sizes and capabilities to and from the active runway for landing and takeoff. To help you to assure the safe movement of the airplanes on the ground and in the air, **Tower! 3D** provides flight strips, ground and air radar screens, and full 3D view of the airport. The game features an intuitive mouse driven command-center allowing non-English speaking players to enjoy the rich gameplay experience.

Add-ons are already available, and a PRO version is in development and scheduled to launch later this year offering additional content, features and voice recognition.

KEY FEATURES
- 3 photorealistic airports (add-ons will be released)
- Advanced AI pilots to follow your commands
- Stunning 3D rendering of the airports
- Runway assignments for arriving and departing aircraft may be changed
- Runway intersection takeoffs are simulated
- Advanced routing to and from the runways and terminals can be assigned
- Dynamic lighting and shadows, day-night cycles provide a stunning visual experience
- Live airport with service cars for airplanes and vehicle traffic around the airports
