

GAME PROMOTER

'MOP: Operation Cleanup' Now Available On WiiU® Challenges You To Save The World From Radiation And Pollution

Indie game developer and publisher [EnsenSoft](#) is proud to announce the North American WiiU® release of **MOP: Operation Cleanup**, an exciting platform adventure in which radiation and trash has destroyed the planet, and heroic actions are required to clean up the mess.

Trailer: <https://www.youtube.com/watch?v=igIQ7fQgfR0>

You are **MOP**, a trashcan and valiant defender of the environment on a mission to clean up the world. Evil dominates the streets and everywhere you look, trash is littering the road, and the foul odor is polluting and contaminating what life is left. Your objective is to guide **MOP** through five challenging worlds, each containing ten difficult missions full of pixel-perfect platforming fun. Run, jump, swim and slide your way through each world, while destroying enemies and obstacles on your way. You will need a lot of skill, patience and perfect timing to complete certain tasks, as levels in the game contains traps and are full of surprises. Entry levels can be completed by ridding the area for trash or by reaching the end without loss of a life, while later levels require careful planning and a lot of practice... As you progress, you can reenergize by collecting boosters of energy shaped as batteries, but they become harder to discover on later levels.

Do you have what it takes to save the world?
